

Iniciar o AdminServer usando o WLST

1. O **Nodemanager** deve estar iniciado
2. `cd E:\Oracle\Middleware\wlserver_10.3\server\bin`
3. `setWLSEnv.cmd`
4. `java weblogic.WLST`
5. Nota: O **CLASSPATH** em *setWLSEnv.cmd* deve incluir:

E:\Oracle\Middleware\wlserver_10.3\server\lib
6. `wls:/offline>`
`nmConnect('weblogic','password','localhost','5556','SOADomain','E:\Oracle\Middleware\user_projects\domains\SOADomain','ssl')`
7. `nmStart('AdminServer')`
